Input-Output Reasoning: Types of Questions

The types of questions that might be asked in the examination from the Input-Output Reasoning topic are:

Rearrangement Based Ordering: In these types of questions, words/ Numbers will be arranged alphabetically(forward or reversed). Candidates will have to arrange the words and numbers simultaneously in each step.

Based on Interchanging the positions and numbers: In these, the specific position of numbers will be changed keeping the remaining one unchanged.

Based on Mathematical Operations: In these types of questions, some basic mathematical operations such as adding, dividing, subtracting, multiplying etc will be applied in each step

Based on Single Shift: In these types of questions in input-output reasoning letters, numbers, rearranging, and alphanumeric series will take place from only one end either from the right end or left end.

Based on Double shifting: In these types of Input-output reasoning letters, numbers series will take place from both end right and left simultaneously.

Based on Box: In these types of input-output reasoning questions numbers and letters are given along with some different different box that need to be applied on it in each steps.

Tricks to Solve Input-Output Reasoning

We have discussed some tricks which will be helpful for the candidates to solve the questions of Input-Output.

1. While solving the question of Input-Output, candidates are advised to read the question carefully and analyze the pattern of the question.
2. Carefully check the steps from which output is formed, as this will be helpful in solving the question more easily.
3. Try to use tabular form while solving these questions because the length of the Input is longer and it might make the solution confusing.
4. Avoid using these types of questions verbally as this may result in answering the questions wrongly.
5. Once the pattern is understood, try to apply the same to the input.

INPUT OUTPUT

Questions (1 to 3): Study the following information carefully to answer these Questions:

A number sorting machine when given an input of numbers, rearranges them in a particular manner step-by-step as indicated below till all the numbers are arranged. Given below is an illustration of this arrangement.

Input:	39	121	48	18	76	112	14	45	63	96
Step I:	14	39	121	48	18	76	112	45	63	96
Step II:	14	39	48	18	76	112	45	63	96	121
Step III:	14	18	39	48	76	112	45	63	96	121
Step IV:	14	18	39	48	76	45	63	96	112	121
Step V:	14	18	39	45	48	76	63	96	112	121
Step VI:	14	18	39	45	48	63	76	96	112	121

And Step VI is the last step for this input.

Q 1. What will be step III for following input?

Input:	68	182	39	93	129	46	21	58
(a)	21	39	68	129	93	46	58	182
(b)	21	39	68	93	129	46	58	182
(c)	21	68	39	93	129	46	58	182

(d) Cannot be determined

(e) None of these

INPUT OUTPUT

Questions (1 to 3): Study the following information carefully to answer these Questions:

A number sorting machine when given an input of numbers, rearranges them in a particular manner step-by-step as indicated below till all the numbers are arranged. Given below is an illustration of this arrangement.

Input:	39	121	48	18	76	112	14	45	63	96
Step I:	14	39	121	48	18	76	112	45	63	96
Step II:	14	39	48	18	76	112	45	63	96	121
Step III:	14	18	39	48	76	112	45	63	96	121
Step IV:	14	18	39	48	76	45	63	96	112	121
Step V:	14	18	39	45	48	76	63	96	112	121
Step VI:	14	18	39	45	48	63	76	96	112	121

And Step VI is the last step for this input.

Q 1. What will be step III for following input?

Input:	68	182	39	93	129	46	21	58
(a)	21	39	68	129	93	46	58	182
(b)	21	39	68	93	129	46	58	182
(c)	21	68	39	93	129	46	58	182

(d) Cannot be determined

(e) None of these

Questions (21 to 25): Study the following information carefully and answer the Questions given below:

Given an input, a coding machine generates pass codes for six batches every day, as follows:

Input: see the little squirrels jumping here and there Pass code:

Batch I: jumping see here the and little there squirrels

Batch II: the and here little see there jumping squirrels

Batch III: see the there and jumping here squirrels little

Batch IV: and jumping there here the squirrels see little and so on.

The first batch timing is 10.00 a.m. and each batch is of one hour's duration. There is a rest period of one hour after the work for the fourth batch is over.

Q 21. If the pass code on a day for the second batch is 'are of clouds transformed they bhakti the as', what will be the pass code for the batch at 3.00 p. m. on that day?

a) clouds are bhakti as the they of transformed

b) of the bhakti clouds are as they transformed

c) the they clouds are as bhakti transformed of

d) are of as the they bhakti transformed clouds

e) None of these
