

Unicommerce is a leading e-commerce enablement SaaS platform that powers end-to-end e-commerce operations for brands, marketplaces, and logistics providers. Its full-stack solutions streamline both pre-purchase and post-purchase processes, driving efficiency and growth.

Convertway by Unicommerce is a marketing automation platform that enhances customer engagement. It helps brands increase sales by capturing visitor data, automating WhatsApp and SMS communications, running campaigns, and providing chatbot support.

Uniware is an advanced order processing platform that optimizes operations after an order is placed. It enables seamless inventory management, multi-channel order processing, returns handling, and payment reconciliation. Uniware offers seller, order, warehouse, and inventory management, along with omnichannel solutions.

Shipway by Unicommerce is a logistics platform that reduces shipping costs through courier aggregation and automation. Its key solutions include smart courier allocation, order tracking, and return automation.

With 270+ plug-and-play integrations, Unicommerce seamlessly connects with marketplaces, logistics providers, and ERP systems, enabling brands to optimize inventory, automate logistics, and ensure compliance.

Unicommerce powers 7,000+ clients across India, Southeast Asia, and the Middle East, including FabIndia, Lenskart, Timex, TCNS, Mamaearth, Sugar, Emami, Urban Company, Blue Star, Cello, Symphony, Healthkart, GNC, boAt, Portronics, TMRW, Mensa, Landmark Group, and Edamama.

Designed for enterprises of all sizes, online and offline, Unicommerce processes over 1Bn+ annual transactions across 8,900+ warehouses and 2,900+ stores as of December 31, 2024.

Incorporated in 2012, Unicommerce is listed on NSE India and BSE. As an ISO 27701 & 27001 certified organization, it upholds the highest standards of data security and privacy compliance.

## JOB DESCRIPTION

Tackle challenging issues in large-scale distributed coordination, scaling, algorithm optimization, operations research, and data processing. We maintain a flat organizational structure where everyone contributes to coding and deployment.

You will take full ownership of components from start to finish. Strong skills in software system design, problem-solving, and object-oriented programming are essential.

## RESPONSIBILITIES

### Code Development:

- Write, test, and maintain code for various software applications.

- Collaborate with team members to design and implement new features.

**Debugging and Troubleshooting:**

- Identify and fix bugs in existing software.
- Assist in troubleshooting issues reported by users or QA teams.

**Collaboration:**

- Work closely with senior engineers and cross-functional teams.
- Participate in code reviews and provide constructive feedback.

**Learning and Development:**

- Engage in training and mentorship opportunities to enhance technical skills.
- Stay updated with industry trends and technologies.

**Testing:**

- Assist in developing and executing test plans to ensure software quality.
- Conduct unit tests and participate in integration testing.

**Project Involvement:**

- Contribute to project planning and status updates.
- Assist in gathering requirements and user feedback.

**Version Control:**

- Collaborate on code repositories with team members.

## SKILLS

- Fundamental knowledge of the Java programming language
- Database technologies: MySQL, MongoDB
- Cloud platform: AWS
- Server technology: Tomcat
- Familiarity with software development methodologies (e.g., Agile, Scrum).
- Strong problem-solving skills and attention to detail.
- Good communication and teamwork abilities.

## WHY UNICOMMERCE?

Contribute to the evolution of our product portfolio atop our high performing SAAS platform. We help sellers & enterprises around the world automate their ecommerce operations via a suite of products: multi-channel order and inventory management, warehouse & vendor management, Omni-channel etc.

Work in a tight-knit high performance team, alongside strong problem solvers graduated from IITs/NITs and other Tier 1 colleges. We have a flat hierarchy. Take end to end ownership of business projects and product features.
