CHITKARA UNIVERSITY

- Speed, Time & Distance – Introduction & Concept
- Speed Distance Time is one of the most popular and important topics in the Mathematics or Quants section of any competitive exam. The concept of Speed, Time and Distance is used extensively for questions relating to different topics such as motion in a straight line, circular motion, boats and streams, races, clocks, etc. Aspirants should try to understand the inter-relationship between the factors speed, distance and time.
- Relationship Between Speed, Time & Distance
- **Speed = Distance/Time** – This tells us how slow or fast an object moves. It describes the distance travelled divided by the time taken to cover the distance.
- Speed is directly Proportional to Distance and Inversely proportional to Time. Hence,
- **Distance = Speed X Time**, and
- **Time = Distance / Speed**, as the speed increases the time taken will decrease and vice versa.

- **Average Speed = (Total distance traveled)/(Total time taken)**
- **Case 1 –** When the distance is constant: **Average speed = 2xy/x+y**; Where, x and y are the two speeds at which the same distance has been covered.
- **Case 2** – When the time taken is constant: **Average speed = (x + y)/2**; Where, x and y are the two speeds at which we traveled for the same time.
- Speed, Time & Distance Conversions :
- To convert from km / hour to m / sec, we multiply by 5 / 18. So, 1 km / hour = 5 / 18 m / sec
- To convert from m / sec to km / hour, we multiply by 18 / 5. So, 1 m / sec = 18 / 5 km / hour = 3.6 km / hour

TIME SPEED AND DISTANCE

Q 1. A train runs at the rate of 45 km an hour. What is its speed in metre per second?

(a) 12.5 m/sec (b) 25 m/sec (c) 10 m/sec (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q 1. A train runs at the rate of 45 km an hour. What is its speed in metre per second?

(a) 12.5 m/sec (b) 25 m/sec (c) 10 m/sec (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q2. A train runs at the rate of 54 km an hour. What is its speed in metres per second?

(a) 15 m/sec (b) 25/2 m/sec (c) 8 m/sec (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q2. A train runs at the rate of 54 km an hour. What is its speed in metres per second?

(a) 15 m/sec (b) 25/2 m/sec (c) 8 m/sec (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q3. **Compare the rates of two trains, one travelling at 45 km an hour and the other at 10 m a second.**

(a) 4 : 5 (b) 3 : 5 (c) 5 : 4 (d) 5 : 3

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q3. **Compare the rates of two trains, one travelling at 45 km an hour and the other at 10 m a second.**

(a) 4 : 5 (b) 3 : 5 (c) 5 : 4 (d) 5 : 3

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q4. A man is walking at a speed of 6 km per hour. After every km he takes rest for 6 minutes. How much time will he take to cover a distance of 18 km.

(a) 5 hrs (b) 5 hrs 42 min (c) 4 hrs 42 min (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q4. A man is walking at a speed of 6 km per hour. After every km he takes rest for 6 minutes. How much time will he take to cover a distance of 18 km.

(a) 5 hrs (b) 5 hrs 42 min (c) 4 hrs 42 min (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q 5. A man covers a certain distance by car driving at 40 km/hr and he returns back to the starting point riding on a scooter at 10 km/hr. Find his average speed for the whole journey.

(a) 8 km/hr (b) 16 km/hr (c) 12 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q 5. A man covers a certain distance by car driving at 40 km/hr and he returns back to the starting point riding on a scooter at 10 km/hr. Find his average speed for the whole journey.

(a) 8 km/hr (b) 16 km/hr (c) 12 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q6. A boy goes to school with 4/5th of original speed and he reached school 5 min. late. Find actual time?

(a) 8 min. (b) 16 min. (c) 20 min. (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q6. A boy goes to school with 4/5th of original speed and he reached school 5 min. late. Find actual time?

(a) 8 min. (b) 16 min. (c) 20 min. (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q7. A train goes with 7/11th of its original speed and takes 22 hours. If it goes with original speed, how many hours will be saved?

(a) 8 h (b) 16 h (c) 12 h (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q7. A train goes with 7/11th of its original speed and takes 22 hours. If it goes with original speed, how many hours will be saved?

(a) 8 h (b) 16 h (c) 12 h (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q8. Speed of a father and a son is 12 km/h and 18 km/hr. They want to travel A to B. Son start after 39 min of his father start and reached 21 min. before father at B. Find distance b/w A to B?

(a) 18 km (b) 36 km (c) 42 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q8. Speed of a father and a son is 12 km/h and 18 km/hr. They want to travel A to B. Son start after 39 min of his father start and reached 21 min. before father at B. Find distance b/w A to B?

(a) 18 km (b) 36 km (c) 42 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q9. A person goes to his in-laws house at 40 km/hr he reach 2 hrs early and next time he goes with 30 km/h, he reach 1 hour earlier. Find distance, actual time and speed?

(a) 120 km,5h,24km/h (b) 150km,6h,30km/h (c) 180km,8h,35km/h

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q9. A person goes to his in-laws house at 40 km/hr he reach 2 hrs early and next time he goes with 30 km/h, he reach 1 hour earlier. Find distance, actual time and speed?

(a) 120 km,5h,24km/h (b) 150km,6h,30km/h (c) 180km,8h,35km/h

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q10. A man starts to travel in order to reach his in-laws house at the speed of 60 km/hr and reaches 1 hours late. If travels at 80 km/hr than he is reaches 2 hours early. What is the distance, actual speed and actual time?

(a) 720 km,11h,720/11km/h (b) 750km,6h,50km/h (c) 780km,8h,35km/h

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q10. A man starts to travel in order to reach his in-laws house at the speed of 60 km/hr and reaches 1 hours late. If travels at 80 km/hr than he is reaches 2 hours early. What is the distance, actual speed and actual time?

(a) 720 km,11h,720/11km/h (b) 750km,6h,50km/h (c) 780km,8h,35km/h

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q11. If a man runs at 10 km/h than he arrives a a certain place at 1 pm. But if he increases his speed 5 km/h than he reached there at 11 a.m. At what speed must he run to reaches there at 12 p.m?

(a) 8 km/hr (b) 16 km/hr (c) 12 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q11. If a man runs at 10 km/h than he arrives a a certain place at 1 pm. But if he increases his speed 5 km/h than he reached there at 11 a.m. At what speed must he run to reaches there at 12 p.m?

(a) 8 km/hr (b) 16 km/hr (c) 12 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q12. A person can travel a certain distance in 30 hours if he decrease his speed by $1/15^{th}$ than he would cover 10 km less in same time. Find the speed of that person.

(a) 8 km/hr (b) 6 km/hr (c) 5 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q12. A person can travel a certain distance in 30 hours if he decrease his speed by $1/15^{th}$ than he would cover 10 km less in same time. Find the speed of that person.

(a) 8 km/hr (b) 6 km/hr (c) 5 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q13. A police man saw a thief at a distance of 200 metre and he start to chase him. Speed of police and thief are 12 km/h and 10 km/hr resp. Find the distance travelled by thief before arrested?

(a) 2 km/hr (b) 1 km/hr (c) 4 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q13. A police man saw a thief at a distance of 200 metre and he start to chase him. Speed of police and thief are 12 km/h and 10 km/hr resp. Find the distance travelled by thief before arrested?

(a) 2 km (b) 1 km (c) 4 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q14. A policeman saw a thief at a 700 metre distance start to chase. Policeman can run 47 km in 34 min and the thief can run 47 km in 41 min. Find the distance travelled by thief before arrested?

(a) 3.4 km (b) 1.6 km/hr (c) 1.2 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q14. A policeman saw a thief at a 700 metre distance start to chase. Policeman can run 47 km in 34 min and the thief can run 47 km in 41 min. Find the distance travelled by thief before arrested?

(a) 3.4 km (b) 1.6 km/hr (c) 1.2 km/hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q15. Distance b/w A and B is 60 km. Two person P and Q start from A simultaneously to pt B speed of P is 4 km/h less than speed of Q. Q reached at B and return immediately and meet P a distance of 12 k.m from B. Find speed of P and Q?

(a) 8 & 10 km/hr (b) 8 & 12 km/hr (c) 12 & 12 km/hr

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q15. Distance b/w A and B is 60 km. Two person P and Q start from A simultaneously to pt B speed of P is 4 km/h less than speed of Q. Q reached at B and return immediately and meet P a distance of 12 k.m from B. Find speed of P and Q?

(a) 8 & 10 km/hr (b) 8 & 12 km/hr (c) 12 & 12 km/hr

(d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q16. Distance b/w A and B is 96 km. Two person P and Q having speed 50 km/h and 70 km/hr. Start from A to B simultaneously. Q reached at B and return immediately and meet P at a distance of x km from B. Find x?

(a) 8 km (b) 16 km (c) 12 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q16. Distance b/w A and B is 96 km. Two person P and Q having speed 50 km/h and 70 km/hr. Start from A to B simultaneously. Q reached at B and return immediately and meet P at a distance of x km from B. Find x?

(a) 8 km (b) 16 km (c) 12 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q17. Radha and Shyam with the speed of 15 km/hr and 21 km/h start to meet each other. At the time of meeting shyam has travelled 500 metre more than Radha. Find the distance b/w Radha and Shyam?

(a) 3 km (b) 6 km (c) 12 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q17. Radha and Shyam with the speed of 15 km/hr and 21 km/h start to meet each other. At the time of meeting shyam has travelled 500 metre more than Radha. Find the distance b/w Radha and Shyam?

(a) 3 km (b) 6 km (c) 12 km (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q18. Distance b/w A to B is 660 km. Two person from A and B with speed of 60 and 50 km/h start to meet each other. Find meeting time?

(a) 8 hr (b) 16 hr (c) 22 hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q18. Distance b/w A to B is 660 km. Two person from A and B with speed of 60 and 50 km/h start to meet each other. Find meeting time?

(a) 8 hr (b) 16 hr (c) 22 hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q19. Distance b/w A and B is 820 km two person A and B having speed 40 km/h and 90 km/h start to meet each other. P start of 8 o-clock and Q start of 9 o-clock. At what time will they meet?

(a) 3 of clock (b) 4 of clock (c) 5 of clock (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q19. Distance b/w A and B is 820 km two person A and B having speed 40 km/h and 90 km/h start to meet each other. P start of 8 o-clock and Q start of 9 o-clock. At what time will they meet?

(a) 3 of clock (b) 4 of clock (c) 5 of clock (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q20. Radha and Shyam start to meet each other one from and Shyam from mothura speed of each is 5 km/hr. Radha decrease her speed one k.m per hour after every hour. And shyam increases his speed 1 km/hr after every 1 hour. If the distance b/w Agra and Mathura is 110 km. Find the time of meeting?

(a) 8 hr (b) 10 hr (c) 12 hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q20. Radha and Shyam start to meet each other one from and Shyam from mothura speed of each is 5 km/hr. Radha decrease her speed one k.m per hour after every hour. And shyam increases his speed 1 km/hr after every 1 hour. If the distance b/w Agra and Mathura is 110 km. Find the time of meeting?

(a) 8 hr (b) 10 hr (c) 12 hr (d) None of these

CHITKARA UNIVERSITY

TIME SPEED AND DISTANCE

Q21. If a boy increases his speed by 3 km/hr than he reach 50 min. Early. If he decreases his speed by 2 km/hr then he reached 40 min. Late. Find the distance, actual speed and time?

(a) 27km/hr,500min,225km

(b) 36km/hr,600min,300km

(c) 42km/hr,400min,250km

(d) None of these

Q35. A train met with an accident 60 km away from Anantpur station. It completed the remaining journey at 5/6th of the previous speed and reached the Baramula station 1 hour 12 min. late. Had the accident take place 60 km further, it would have been only 1 hour late. What is the distance between Anantpur and Baramula?

(a) 420 km (b) 650 km (c) 720 km (d) None of these
