

## Business Analyst (Internship)

Location: Gurugram (Onsite)

### Our vision

#### 100x retail in 5 years

Imagine needing something when you are at home and getting it before you have tied your shoelaces to step out. Blinkit is revolutionising e-commerce by making the stuff most important to you, available to you in a blink of your eye.

We want our customers to focus on the more important things for themselves and not need to plan for the little things that life needs on an everyday basis. We are here to get your chores out of your way. We do this by using a backbone of technology, data sciences, and rich customer insight, resulting in a dense and fast network of dark stores for lightning fast deliveries under 10 minutes.

We are already one of the largest e-grocery companies in India. Our ambition however, is to be 100x this size in the next five years.

In order to become one of the most important e-retail companies of our generation, we need builders who can think on their feet, take extreme ownership and commit to making outcomes happen. If you are ambitious, smart, and don't have an ego about it, we'd love to hear from you. Opportunities to create \$100 billion businesses in India are rare. We are on the way and looking for the hungry.

### About the team

The Blinkit Warehouse Team is responsible for ensuring smooth operations across all warehouses in India. We manage the inbound and outbound processes, oversee inventory management, and handle manpower logistics to maintain efficiency and productivity. We value our people and are working on improving the entire lifecycle of our on-ground workers.

### What you will do

- Dive deep into datasets to surface actionable insights for business and ops teams.
- Design and maintain dashboards to track key business metrics.
- Collaborate closely with product, business, and supply chain teams to define and monitor KPIs.
- Write efficient SQL queries to extract and transform data.
- Assist in automating reporting processes and building data pipelines.
- Present clear analysis to stakeholders, supporting decision-making across teams.

### What you need

- B.Tech / M.Tech (Computer Science, IT, Electronics preferred)
- Proficiency in excel / google sheets
- Strong SQL
- Strong Problem-solving skills.
- Good Communication skills.
- Knowledge of business operations.
