

AWS DynamoDB – Create Table and Perform CRUD Operations

Task:

Create a DynamoDB table using AWS Management Console and perform CRUD operations.

(a) Create DynamoDB Table:

1. Login to AWS Management Console
Open <https://aws.amazon.com/> and sign in
2. Open **DynamoDB Service**
Search and select DynamoDB
3. Click **Create table**
4. Table details:
 - Table name: StudentTable
 - Partition key: StudentID (String)
5. Leave default settings (or choose on-demand mode)
6. Click **Create table**

(b) Insert Data (Create Operation):

1. Open StudentTable
2. Click **Explore table items**
3. Click **Create item**
4. Add values:
 - StudentID: 101
 - Name: Rahul
 - Department: cse
5. Click **Save**

(c) Read Data (Read Operation):

1. Go to **Explore items**
2. Select item with StudentID = 101
3. View stored data:
 - StudentID
 - Name
 - Department

(d) Update Data (Update Operation):

1. Select item StudentID = 101
2. Click **Edit item**
3. Change value:
 - Department: IT
4. Click **Save changes**

(e) Delete Data (Delete Operation):

1. Select item StudentID = 101
2. Click **Delete item**
3. Confirm deletion

Result:

- DynamoDB table created successfully
- Data inserted, read, updated, and deleted successfully
- CRUD operations performed using AWS Management Console
-
