

AWS EC2 – Create AMI from Existing Instance and Launch New Instance

Task:

Create an AMI from an existing EC2 instance and launch a new EC2 instance using that AMI.

(a) Create EC2 Instance:

1. Login to AWS Management Console
Open <https://aws.amazon.com/> and sign in.
2. Open EC2 Dashboard
Go to Services → EC2.
3. Click Launch Instance
4. Enter Instance Name
Example: BaseServer
5. Choose AMI
Select Ubuntu Server 22.04 LTS or Amazon Linux 2
6. Select Instance Type
Choose t2.micro (Free Tier)
7. Create Key Pair
Name: mykey
Format: .pem
Download and save file
8. Configure Security Group
Allow SSH (Port 22)
9. Launch Instance
Wait until instance is Running

(b) Create AMI from Existing Instance:

1. Go to EC2 Dashboard
2. Select running instance (BaseServer)
3. Click **Actions** → **Image and templates** → **Create Image**
4. Enter details:
 - Image name: MyCustomAMI
 - Description: Custom AMI from EC2 instance
5. Click **Create Image**
6. Wait until AMI status becomes **Available**

(c) Launch New Instance Using AMI:

1. Go to EC2 Dashboard
2. Click **AMIs** from left panel
3. Select MyCustomAMI
4. Click **Launch Instance from AMI**
5. Configure:
 - Instance Name: NewServerFromAMI
 - Instance Type: t2.micro
 - Key Pair: same or new (mykey.pem)
 - Security Group: allow SSH (22)
6. Click **Launch Instance**

(d) Verify New Instance:

1. Go to EC2 Instances
2. Check new instance status = Running
3. Connect using SSH:

```
ssh -i mykey.pem ubuntu@<Public-IP>
```
