

AWS EC2 Instance – Create Multiple Users and Access (Detailed)

Task:

Launch an EC2 instance and create multiple users with access.

(a) Steps to Launch EC2 Instance (Ubuntu):

1. Login to AWS Management Console

- Open <https://aws.amazon.com/>
- Click **Sign In** and enter credentials.

2. Open EC2 Dashboard

- Search for **EC2**
- Click on **EC2 Dashboard**

3. Launch Instance

- Click **Launch Instance**

4. Enter Instance Name

- Example: MyUbuntuServer

5. Choose Operating System

- Select **Ubuntu Server 22.04 LTS (64-bit)**

6. Select Instance Type

- Choose **t2.micro** (Free Tier Eligible)
- Example:
 - vCPU: 1
 - RAM: 1 GB

7. Create Key Pair

- Click **Create new key pair**
- Name: mykey
- Format: .pem
- Download and save file

8. Configure Network Settings

- Allow **SSH (Port 22)**
- Source: Anywhere (0.0.0.0/0)

9. **Configure Storage**

- Default: 8 GB SSD

10. **Launch Instance**

- Click **Launch Instance**
- Wait until status = **Running**

11. **Copy Public IP**

- Example: 3.110.25.60

(b) Connect to EC2 Instance:

1. Open Command Prompt / Terminal
2. Go to folder where key is stored:
`cd Downloads`
3. Connect using SSH:
`ssh -i mykey.pem ubuntu@3.110.25.60`
4. First time type **yes** to continue
5. Login successful:
`ubuntu@ip-172-31-xx-xx:~$`

(c) Create Multiple Users:

1. Create first user:
`sudo adduser user1`
 - Enter password and details
2. Create second user:
`sudo adduser user2`
3. Create third user:
`sudo adduser user3`

(d) Provide Access to Users:

1. Give Sudo (Admin) Access

```
sudo usermod -aG sudo user1
```

```
sudo usermod -aG sudo user2
```

2. Allow SSH Access

- Users can login using:

```
ssh user1@3.110.25.60
```

3. Set Home Directory Permission (Optional)

```
sudo chmod 700 /home/user1
```

(e) Verify Users:

1. List all users:

```
cat /etc/passwd
```

2. Switch to another user:

```
su user1
```

3. Check current user:

```
whoami
```

Example Summary:

- Instance Name: MyUbuntuServer
- OS: Ubuntu 22.04
- Public IP: 3.110.25.60
- Users Created: user1, user2, user3

Result:

- EC2 instance created successfully
- Multiple users added
- Users can access system using SSH
