

AWS EC2 Amazon Linux – Install Web Server and Host HTML Page

Task:

Launch an Amazon Linux EC2 instance, install Apache/Nginx web server, and display a custom HTML page using the public IP.

(a) Steps to Launch Amazon Linux EC2 Instance:

1. Login to AWS Management Console

- Open <https://aws.amazon.com/>
- Click **Sign In**

2. Open EC2 Dashboard

- Search for **EC2**
- Click **EC2 Dashboard**

3. Launch Instance

- Click **Launch Instance**

4. Enter Instance Name

- Example: MyWebServer

5. Choose OS

- Select **Amazon Linux 2 (64-bit)**

6. Select Instance Type

- Choose **t2.micro** (Free Tier Eligible)

7. Create Key Pair

- Name: mykey
- Format: .pem
- Download file

8. Configure Network Settings

- Allow:
 - SSH (Port 22)
 - HTTP (Port 80)

9. **Configure Storage**

- Default: 8 GB

10. **Launch Instance**

- Click **Launch Instance**
- Wait until status = **Running**

11. **Copy Public IP**

- Example: 13.232.101.25

(b) Connect to EC2 Instance:

1. Open Command Prompt / Terminal
2. Navigate to key location:
`cd Downloads`
3. Connect using SSH:
`ssh -i mykey.pem ec2-user@13.232.101.25`

(c) Install Apache Web Server:

1. Update system:
`sudo yum update -y`
2. Install Apache:
`sudo yum install httpd -y`
3. Start Apache:
`sudo systemctl start httpd`
4. Enable auto-start:
`sudo systemctl enable httpd`

(Alternative) Install Nginx:

1. Install Nginx:
`sudo amazon-linux-extras install nginx1 -y`
2. Start Nginx:
`sudo systemctl start nginx`
3. Enable Nginx:
`sudo systemctl enable nginx`

(d) Create Custom HTML Page:

1. Go to web directory:
`cd /var/www/html`
2. Create file:
`sudo nano index.html`
3. Add HTML content:

Hello from EC2 Web Server

This is my custom web page

4. Save and exit

(e) Access Web Page:

1. Open browser
2. Enter Public IP:
<http://13.232.101.25>
3. Your custom page will be displayed

Example Summary:

- Instance Name: MyWebServer
- OS: Amazon Linux 2
- Web Server: Apache / Nginx
- Public IP: 13.232.101.25

Result:

- EC2 instance launched successfully
- Web server installed and running
- Custom HTML page displayed using public IP
-
