

AWS S3 – Create Bucket and Upload Files

Task:

Create an S3 bucket and upload files to it.

(a) Create S3 Bucket:

1. Login to AWS Management Console
Open <https://aws.amazon.com/> and sign in
2. Open S3 Service
Search for **S3** in services
3. Click **Create bucket**
4. Enter Bucket Details:
 - Bucket Name: `my-first-s3-bucket-12345` (must be unique)
 - AWS Region: Choose nearest region (e.g., `ap-south-1`)
5. Block Public Access Settings:
 - Keep default (recommended for security)
 - OR uncheck if public access is needed
6. Click **Create bucket**

(b) Upload Files to S3 Bucket:

1. Open created bucket
Example: `my-first-s3-bucket-12345`
2. Click **Upload**
3. Click **Add files**
4. Select file from local system
Example:
 - `image.jpg`
 - `document.pdf`

5. Click **Upload**
6. Wait for upload to complete

(c) Verify Uploaded Files:

1. Open S3 bucket
2. Check list of uploaded files
3. Click file name to view details
4. Copy **Object URL** (if public access is enabled)

Example:

- Bucket Name: my-first-s3-bucket-12345
- File Uploaded: testfile.txt

Result:

- S3 bucket created successfully
- Files uploaded to S3 bucket
- Objects stored securely in cloud storage
