

Equilateral Triangle

An equilateral triangle is a triangle in which all three sides are equal.

Let each side be a .

Height Formula

$$h = (\sqrt{3} / 2)a$$

where:

- h = height
- a = side length

Area Formula

$$A = (\sqrt{3} / 4)a^2$$

where:

- A = area
- a = side length

Example

If $a = 6$ cm :

- Height = $3\sqrt{3}$ cm
- Area = $9\sqrt{3}$ cm²
