

DATA SUFFICIENCY

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question and
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 1. Question: In which year was Rahul born ?

Statements:

1. Rahul at present is 25 years younger to his mother.
2. Rahul's brother, who was born in 1964, is 35 years younger to his mother

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question and
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 1. Question: In which year was Rahul born ?

Statements:

1. Rahul at present is 25 years younger to his mother.
2. Rahul's brother, who was born in 1964, is 35 years younger to his mother

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 2. Question: What will be the total weight of 10 poles, each of the same weight ?

Statements:

1. One-fourth of the weight of each pole is 5 kg.
2. The total weight of three poles is 20 kilograms more than the total weight of two poles.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 2. Question: What will be the total weight of 10 poles, each of the same weight ?

Statements:

1. One-fourth of the weight of each pole is 5 kg.

2. The total weight of three poles is 20 kilograms more than the total weight of two poles.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 3. Question: How many children does M have ?

Statements:

- 1.H is the only daughter of X who is wife of M.
- 2.K and J are brothers of M.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 3. Question: How many children does M have ?

Statements:

1.H is the only daughter of X who is wife of M.

2.K and J are brothers of M.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 4. Question: How much was the total sale of the company ?

Statements:

1. The company sold 8000 units of product A each costing Rs. 25.
2. This company has no other product line.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 4. Question: How much was the total sale of the company ?

Statements:

1. The company sold 8000 units of product A each costing Rs. 25.
2. This company has no other product line.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 5. Question: The last Sunday of March, 2006 fell on which date ?

Statements:

1. The first Sunday of that month fell on 5th.
2. The last day of that month was Friday.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 5. Question: The last Sunday of March, 2006 fell on which date ?

Statements:

1. The first Sunday of that month fell on 5th.

2. The last day of that month was Friday.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 6. Question: How many students in a class play football ?

Statements:

1. Only boys play football.
2. There are forty boys and thirty girls in the class.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 6. Question: How many students in a class play football ?

Statements:

1. Only boys play football.
2. There are forty boys and thirty girls in the class.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 7. Question: Who is C's partner in a game of cards involving four players A, B, C and D ?

Statements:

- 1.D is sitting opposite to A.
- 2.B is sitting right of A and left of D.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 7. Question: Who is C's partner in a game of cards involving four players A, B, C and D ?

Statements:

1.D is sitting opposite to A.

2.B is sitting right of A and left of D.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 8. Question: On a T.V. channel, four serials A, B, C and D were screened, one on each day, on four consecutive days but not necessarily in that order. On which day was the serial C screened ?

Statements:

1. The first serial was screened on 23rd, Tuesday and was followed by serial D.
2. Serial A was not screened on 25th and one serial was screened between serials A and B.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question**
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 8. Question: On a T.V. channel, four serials A, B, C and D were screened, one on each day, on four consecutive days but not necessarily in that order. On which day was the serial C screened ?

Statements:

1. The first serial was screened on 23rd, Tuesday and was followed by serial D.
2. Serial A was not screened on 25th and one serial was screened between serials A and B.

DATA SUFFICIENCY

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 9. Question: How is Sulekha related to Nandini ?

Statements:

1. Sulekha's husband is the only son of Nandini's mother.
2. Sulekha's brother and Nandini's husband are cousins.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 9. Question: How is Sulekha related to Nandini ?

Statements:

1. Sulekha's husband is the only son of Nandini's mother.
2. Sulekha's brother and Nandini's husband are cousins.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 10. Question: Can Ritesh retire from office X in January 2006, with full pension benefits ?

Statements:

1. Ritesh will complete 30 years of service in office X in April 2000 and desires to retire.
2. As per office X rules, an employee has to complete minimum 30 years of service and attain age of 60. Ritesh has 3 years to complete age of 60.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 10. Question: Can Ritesh retire from office X in January 2006, with full pension benefits ?

Statements:

1. Ritesh will complete 30 years of service in office X in April 2000 and desires to retire.
2. As per office X rules, an employee has to complete minimum 30 years of service and attain age of 60. Ritesh has 3 years to complete age of 60.

- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 12. Question: Madan is elder than Kamal and Sharad is younger than Arvind. Who among them is the youngest ?

Statements:

- 1.Sharad is younger than Madan.
- 2.Arvind is younger than Kamal.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

(A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

(B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question

(C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question

(D) If the data given in both Statements I and II together are not sufficient to answer the Question

(E) If the data in both Statements I and II together are necessary to answer the Question.

Q 12. Question: Madan is elder than Kamal and Sharad is younger than Arvind. Who among them is the youngest ?

Statements:

1. Sharad is younger than Madan.

2. Arvind is younger than Kamal.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 13. Question: On which date in August was Kapil born ?

Statements:

1. Kapil's mother remembers that Kapil was born before nineteenth but after fifteenth.
2. Kapil's brother remembers that Kapil was born before seventeenth but after twelfth.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 16. Question: How much money do Vivek and Suman have together ?

Statements:

1. Suman has 20 rupees less than what Tarun has.
2. Vivek has 30 rupees more than what Tarun has.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question**
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 16. Question: How much money do Vivek and Suman have together ?

Statements:

1. Suman has 20 rupees less than what Tarun has.
2. Vivek has 30 rupees more than what Tarun has.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question and
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 17. Question: Among Monika, Anita, Sonal, Ratna and Tanvy, who came last for the programme ?

Statements:

1. Monika came after Anita but not after Tanvy.
2. Ratna came after Tanvy but not after Sonal.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question and
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 17. Question: Among Monika, Anita, Sonal, Ratna and Tanvy, who came last for the programme ?

Statements:

1. Monika came after Anita but not after Tanvy.
2. Ratna came after Tanvy but not after Sonal.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 18. Question: Who among P, Q, R, S and T is the lightest?

Statements:

1. R is heavier than Q and T but lighter than S.
2. S is not the heaviest.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question**
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 18. Question: Who among P, Q, R, S and T is the lightest?

Statements:

1. R is heavier than Q and T but lighter than S.
2. S is not the heaviest.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 19. Question: How is T related to K?

Statements:

- 1.K has two sons; one of the sons is A.
- 2.The mother of T has only two sons – A and B.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.**

Q 19. Question: How is T related to K?

Statements:

- 1.K has two sons; one of the sons is A.
- 2.The mother of T has only two sons – A and B.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 20. Question: What is the shortest distance between Devipur and Durgapur ?

Statements:

1. Durgapur is 20 kms away from Rampur.
2. Devipur is 15 kms away from Rampur.

DATA SUFFICIENCY

DIRECTION: In each of the Questions below consists of a Question and two Statements numbered I and II given below it. You have to decide whether the data provided in the Statements are sufficient to answer the Question. Read both the Statements and

- (A) If the data in statement I alone are sufficient to answer the Question, while the data in statement II alone are not sufficient to answer the Question
- (B) If the data in statement II alone are sufficient to answer the Question, while the data in statement I alone are not sufficient to answer the Question
- (C) If the data either in statement I alone or in statement II alone are sufficient to answer the Question
- (D) If the data given in both Statements I and II together are not sufficient to answer the Question**
- (E) If the data in both Statements I and II together are necessary to answer the Question.

Q 20. Question: What is the shortest distance between Devipur and Durgapur ?

Statements:

1. Durgapur is 20 kms away from Rampur.
2. Devipur is 15 kms away from Rampur.
